Assignment 4

Due: April 29th before midnight

In this assignment, you will practice how to use php.

it asks you to create a register/login system, a new user is asked to register at register.php; then the user can login the system through login.php, and the main.php page will display a message "welcome, someusername".

you must use mysql to store usernames and passwords, the statement to create the database and table is given below:

create database usermanage;

use usermanage;

CREATE TABLE userinfo(
    id INT NOT NULL AUTO_INCREMENT,
    PRIMARY KEY(id),
    username VARCHAR(30),
    pwd VARCHAR(30))

Submission:
Send your project with .zip or .rar format to email:
