Project Requirement

1. The project is supposed to be a group work requiring co-operation and an individual work as well. So EVERYONE should be involved in their project for EVERY TASK.

2. Each group has the responsibility of securing their files from being extracted by others. If such carelessness results in another group copying the computer files and submitting them for the assignments all students involved will automatically get a zero for the assignment.

Task:

1. Individual work

Design your personal website which can include your information: name, skills, education, courses that you took, experiences, contact, your family, unforgotten happy experiences, your favorite links, favorite sports, favorite TV show, music, movies, actors, actress, etc.

2. Group work

Each group has maximum 6 members. One of the members should be a leader of the group.

Each group should come up with the name of the group, a list of members, a theme. Examples of theme would be music, movies, actors, different cultures, hobbies, books. But it should be informative. In the webpage of each group, there should be links that can direct to each member’s personal webpage.
**Requirements:**

1. File name of the group home page must be `[group_name].html`. File name of each individual home page must be `index.html`.

2. Web pages must have at least 2 pages for the group, 4 pages for each individual website.

3. **Language:** HTML (you can use any HTML editors. Plain text editor such as Notepad is preferred).

4. The project should at least include the following HTML language features:
   - Different headings
   - Different titles
   - Images
   - Different font styles
   - Use background images/colors
   - Hyper links to refer to other Web pages
   - Links to the different sections of the same page
   - Tables
   - Frames
   - Extra credits: Cascade Style Sheets (CSS)

**Submission:** You should upload all web pages to your GSU student account. Your group homepage should be uploaded to your leader’s student account. You have to submit both the individual and group’s work (report and the sources). Each student is supposed to submit each individual report. Each group is supposed to submit a copy of group report.
Submit the following:

**Individual report and code:**

1. A short report (typed) of your project, including your website URL (address), description about the plan, design, the features, functions of your website.

2. If you have some additional features or functions, please mention them in your report.

**Group report and code:**

1. A short report (typed) of the project, including group website URL (address), description about the theme, design.

2. If your group have some additional features or functions, please mention them in the report.

If you only turn in the project written by HTML editor, you will get at most 70/100 points.

**NO late submission will be accepted.**

**Grading policy**

1. Overall design 10 % for group, 10% for individual

2. Use of HTML Language features 40 % for group, 30% for individual

3. Functions, quality of Web pages 5% for group, 5% for individual

Total points 100 %
Publish: The GSU web space of all students is located in the \public_html if you logon a computer on the campus. Please create a folder named public_html if you don't find this folder. You can also use FTP client software to access this folder in other places.

1. Host Name: ftp.student.gsu.edu

2. ID and password: your id and password to logon computers in GSU

3. Directory or folder: public_html. You can add a folder named public_html using Add folder if you don't find this folder.

4. For individual: After you publish it, you can access your personal website by inputting

   www.student.gsu.edu/~yourid/filename.html in the browser.

5. For group: After you publish it, you can access your group’s website by inputting

   www.student.gsu.edu/~group_leader_id/filename.html in the browser.
